

# Python Hata Ayıklama Yarışması

## 1. Hata

```
sayi = input("Bir sayı giriniz: ")
if sayi % 2 == 0:
    print("Çift")
else:
    print("Tek")
```

## 2. Hata

```
isim = "Arda"
if isim = "Arda":
    print("Hoş geldin!")
```

## 3. Hata

```
print "Merhaba Python!"
```

## 4. Hata

```
liste = [10, 20, 30]
print(liste[3])
```

## 5. Hata

```
sayi = 5
while sayi > 0:
    print(sayi)
```

## 6. Hata

```
def topla(a, b):
    return a + b

print(topla(5))
```

## 7. Hata

```
sozluk = {"ad": "Ali", "yas": 20}  
print(sozluk["okul"])
```

## 8. Hata

```
def bol(a, b):  
    return a / b  
  
print(bol(10, 0))
```

## 9. Hata

```
def faktoriyel(n):  
    sonuc = 0  
    for i in range(1, n+1):  
        sonuc *= i  
    return sonuc  
  
print(faktoriyel(5))
```

## 10. Hata

```
def kare_al(x)  
    return x ** 2  
  
sayi = input("Bir sayı giriniz: ")  
print(kare_al(sayi))
```

## Bonus Hata

```
ogrenciler = {"Ali": 85, "Ayşe": 92, "Mehmet": 78}  
ortalama = sum(ogrenciler) / len(ogrenciler)  
print("Ortalama:", ortalama)
```
